Section F Preferences for Customary Routine & Activities

Objectives

- State the intent of Section F Preferences for Customary Routine and Activities.
- Identify the two methods for conducting the assessment for customary routine and activities.
- Describe how to conduct an assessment of a resident's customary routine and activities.
- Code Section F correctly and accurately.

Methodology

This lesson uses lecture, video, and scenario-based practice.

I. Introduction/ Objectives

A. Introduction

This lesson addresses Section F Preferences for Customary Routine and Activities.

Quality of life can be greatly enhanced when care respects the resident's choice regarding anything that is important to the resident.

The intent of the items in this section is to obtain information regarding the resident's preferences for his or her daily routine and activities.

B. Objectives

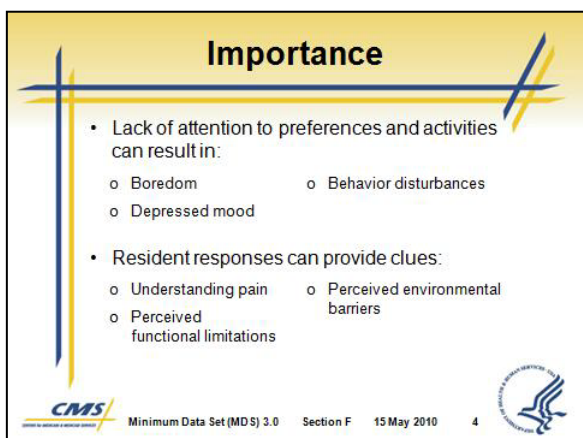

- State the intent of Section F Preferences for Customary Routine and Activities.
- Identify the two methods for conducting the assessment for customary routine and activities.
- Describe how to conduct an assessment of a resident's customary routine and activities.
- Code Section F correctly and accurately.

II. Importance of Assessment

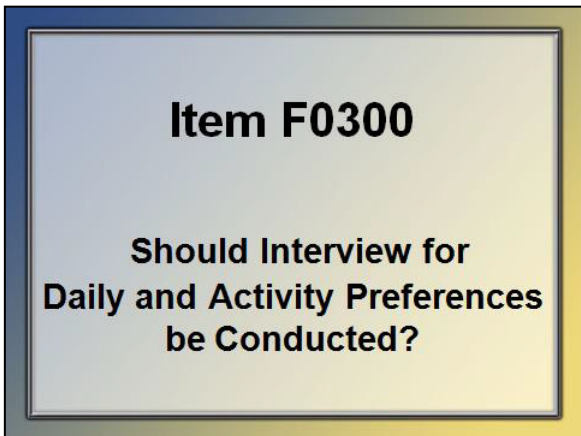

- A. Nursing home residents are individuals with distinct lifestyle preferences.
- B. Activities are a way for individuals to establish meaning in their lives, and the need for enjoyable activities and pastimes does not change on admission to a nursing facility.

- C. A lack of attention to lifestyle preferences or a lack of opportunity to engage in meaningful and enjoyable activities can result in:
 1. Boredom
 2. Depressed mood
 3. Behavior disturbances

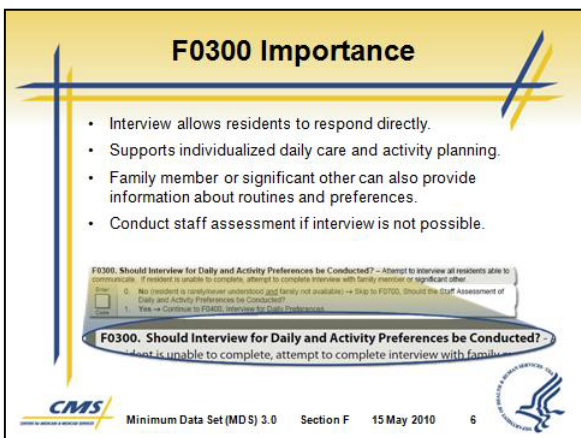

- D. Resident responses (particularly that they cannot do something or have no choice) can provide clues for the following issues
 1. Understanding pain
 2. Perceived functional limitations
 3. Perceived environmental barriers

III. F0300 Should Interview for Daily and Activity Preferences Be Conducted?

A. F0300 Importance

1. MDS Section F can be completed either by a resident interview or by a staff assessment.
 - a. The interview option allows residents to respond directly to questions concerning their daily routine and preferred activities.
 - b. Information about preferences that comes directly from the resident provides specific information for individualized daily care and activity planning.
 - c. If the resident cannot complete the interview, try to interview a family member or significant other who is knowledgeable about the resident’s routine and preferences.
 - d. If an interview is not possible, conduct the staff assessment.

SLIDES

F0300 Conduct the Assessment

- Determine whether or not resident is rarely/ never understood.
- Determine if family/ significant other is available.
- Review A1100 Language to determine if the resident wants or needs an interpreter.

- B. F0300 Conduct the Assessment
1. The assessment for this item is similar as for other interview-based sections.
 2. Determine whether or not resident is rarely/never understood.
 3. Determine if family/ significant other is available.
 4. Review A1100 Language to determine if the resident wants or needs an interpreter.
 - a. Check if A1100 is coded as **1**.
 5. Conduct the interview if the resident can respond:
 - a. Verbally
 - b. By pointing to answers on a cue card
 - c. By writing out his or her answers

F0300 Assessment Guidelines

- Conduct the interview if the resident can respond:
 - o Verbally
 - o By pointing to answers on cue cards
 - o By writing out answers
- Interview family member or significant other.
 - o Can be a source of useful information about resident preferences

IV. F0400 Interview for Daily Preferences/ F0500 Interview for Activity Preferences

- A. Conduct an interview if at all possible to determine the resident’s current preference for daily routine and activities.
- B. Incorporating resident preferences into care planning is a dynamic, collaborative process.
- C. Because residents may adjust their preferences in response to events and changes in status, the preference assessment is intended as a first step in an ongoing dialogue between care providers and the residents.

Slide 11

- D. F0400/ F0500 Interview
 - 1. The information obtained during this interview is just a portion of the assessment.
 - 2. Nursing homes should use this as a guide to create an individualized plan based on the resident’s preferences.
 - 3. The interview is not meant to be all-inclusive.

5. Focus on current preferences but may also consider past preferences if the resident cannot communicate.
6. Residents may give long or indirect answers to interview items.
7. To narrow the answer to the response choices available, it can be useful to:
 - a. Summarize their longer answer.
 - b. Then ask which response option best applies.
8. This technique is known as echoing.
9. For the questions in Section F, it is appropriate to explore a resident's answer and try to understand the reason.

A. F0800 Importance

1. Alternate means of assessing preferences must be used for residents who cannot communicate.
2. This ensures that information about their preferences is not overlooked.

**B. F0800 Conduct the Assessment/
Assessment Guidelines**

1. Observe the resident when the care, routines, and activities specified in these items are made available to the resident.
2. Observations should be made by:
 - a. Staff across all shifts and departments
 - b. Others with close contact with the resident
3. If the resident is happy, content, or involved during an activity listed in F0800, then that item should be checked.
4. If the resident seems to resist or withdraw when these are made available, then do not check that item.
5. Do not do a staff assessment if an interview was completed.
6. A staff assessment is not meant to supplement an interview.
